

Install TradersWorld Bloomberg Ticker Universe

Bloomberg ticker universe for GlobalServer.

This document pre-supposes that you have already installed TradeStation 2000i or ProSuite 2000i, and Adapta 2000i for Bloomberg. If not, you cannot install the TradersWorld custom ticker universe for Bloomberg.

When you purchase TradeStation 2000i, the default tickers and associated ticker universe do not correspond to Bloomberg mnemonics, and are not recognised by Adapta 2000i. GlobalServer will not be able to receive real-time/delayed prices, or download historical prices from Bloomberg.

You have the option to enter Bloomberg tickers manually, using Add New from the Insert Symbol menu, or automatically from the Dictionary if you requested a custom Bloomberg ticker universe from TradersWorld. Contact your TradersWorld account representative for information about how to receive the custom ticker universe.

IMPORTANT: The TradersWorld custom ticker universe for Bloomberg should only be used with a new installation of TradeStation 2000i or ProSuite 2000i, unless otherwise advised by TradersWorld. If you have a previously installed version of TradeStation 2000i or ProSuite 2000i, and would like to use the TradersWorld custom ticker universe for Bloomberg, contact TradersWorld **before attempting to install it**. TradersWorld declines all liability for clients who over-write or replace an existing universe.mdb file without prior agreement from TradersWorld.

To **install the custom Bloomberg ticker universe** proceed as follows.

You must have WinZip installed. Download a free copy from <http://www.winzip.com>

1. Go to the following directory C:\Program Files\Omega Research\Universe.
2. Locate the file named **universe.mdb** and rename it to e.g., **olduniverse.mdb**
3. You will have received a compacted file from TradersWorld named **uniblp.zip**. Using WinZip, Extract the contents of this file to the following directory C:\Program Files\Omega Research\Universe.
4. Close WinZip and Windows Explorer. **Installation is complete.**

Congratulations! You have successfully installed the custom Bloomberg ticker universe .

To begin loading tickers into the GlobalServer Portfolio, download historical prices, and plot your first chart using TradeStation 2000i, refer to the support document entitled *Getting Started with TradeStation 2000i* .
